

Rima Dagher

Full-Stack Developer

📍 Montreal, QC 📞 4385402076 🌐 LinkedIn 🔗 Portfolio 🐙 GitHub

✉ rima.t.dagher@gmail.com

PROFILE

Full-Stack Developer with hands-on experience building scalable, responsive web applications using Python, Java, Node.js, React, and Next.js. Skilled in designing RESTful APIs, managing databases (MySQL, MongoDB), and developing dynamic, user-friendly interfaces. Familiar with AWS fundamentals (IAM policies, S3 buckets, EC2 instances) and eager to expand into serverless architecture with Lambda, API Gateway, and DynamoDB. Passionate about writing clean, maintainable code and thriving in small, Agile teams.

EDUCATION

John Abbott College <i>AEC/ Full-Stack Development</i>	2024 – Present Montreal, Canada
Concordia University <i>Full-Stack Web Development</i> Completed immersive bootcamp focused on JS, React and backend development	2023 Montreal, Canada
Arab Open University <i>Bachelor of Business and Accounting</i>	2018 – 2021 Beirut, Lebanon

TECHNICAL SKILLS

Languages: JavaScript, Java, SQL, PHP, Python, C#, HTML5, CSS3

Frontend: React.js, Next.js, Bootstrap, Tailwind CSS, JavaFX, WPF

Backend: Node.js, Express.js, Laravel, Spring Boot, .NET, FASTapi

Database: MySQL, MongoDB, phpMyAdmin

Cloud & Tools: AWS (IAM, S3, EC2), Git, GitHub, Postman, Docker, Figma, Composer, XAMPP

Concepts: OOP, MVC, Agile/Scrum, CI/CD basics

PROJECTS

PropExchange - Real Estate Platform

Tech Stack: PHP, Laravel, MySql, Bootstrap, Google Maps API, MVC

- Built a data-driven property listing platform with advanced filters and an admin dashboard.
- Integrated Google Maps API for real-time location visualization of properties.
- Applied MVC architecture and Agile workflows in a small team environment.

MovieExplorer - Movie Search Platform

Tech Stack: Next.js, React, MongoDB, Tailwind CSS, REST API

- Designed and developed a responsive dashboard for searching and displaying movie data.
- Integrated third-party REST APIs with dynamic state management using React Context.
- Demonstrated SSR and SSG concepts through Next.js for better performance and SEO.

ChirpSocial - Twitter Clone

Tech Stack: Node.js, Express.js, Azure SQL, REST API, JWT

- Developed secure authentication with JWT and Express middleware.
- Designed REST APIs for posting, retrieving, and managing user content.
- Managed backend database operations and implemented protected routes.

Animal Shelter Manager – JavaFX Desktop

Tech Stack: Java, Spring, JavaFX, MVC, OOP, SOLID Design Principles

- Built a desktop application to manage animals, volunteers, and tasks.
- Implemented modular architecture for scalable features.
- Applied OOP design patterns and integrated data persistence.

CERTIFICATES

Practical GitHub Actions
